Suggested reading path: Executive Conclusion → Top Recommended Actions → Priority Findings → Evidence Appendix → Audit Trail.

Executive Guidance & Recommended Actions

The following sections are designed for decision-makers, website owners, marketing teams, developers, and privacy reviewers. They explain what Auditzo observed, why it matters, what should be reviewed first, and how to use the technical evidence.

1

Understand the conclusion

2

Prioritize the actions

3

Review the evidence

1. Executive Conclusion

WHAT THIS REPORT MEANS

Auditzo observed 7 critical and 3 high priority technology ecosystem(s) for GDPR / ePrivacy. These should be reviewed first.

The technical risk score is 0/100. Strong technical review signals were observed and should be reviewed urgently.

Consent-State Clarity

Auditzo observed the page during the initial page-load window and did not click Accept, Reject, or customize consent choices. Findings should be read as initial-load observations, not as confirmed post-consent or post-rejection behavior.

Where to Start

Start with Top Recommended Actions, then review Priority Findings, then use the Evidence Appendix for technical proof.

Legal Boundary

This is a technical evidence report. It does not decide whether the website complies with any privacy law.

Short Answer

Auditzo displayed 16 technology ecosystem(s), grouped from 33 raw rule-level signal(s), plus 48 cookie(s) and 1 unclassified third-party domain(s) during the automated browser scan.

PLAIN-ENGLISH VERDICT

GDPR / ePrivacy review shows a Critical review priority result mainly because LinkedIn Advertising Ecosystem was observed during initial page load.

The technical review priority score is 0/100 (Critical review priority).

What was detected

- LinkedIn Advertising Ecosystem was the highest-priority observed technology signal.
- 16 technology ecosystem(s) were shown in this report view, grouped from 33 raw rule-level signal(s).
- 48 cookie(s) were observed and classified where possible.

What was not detected in this scan view

No clean absence claims are made from this scan view. Auditzo reports what was observed and avoids claiming a category is absent unless the scan evidence supports it.

Legal boundary: Use this report as technical evidence for review and remediation planning, not as legal advice.

PAID STANDARD VALUE

What you unlocked in this Standard Report

This paid report turns the scan into a practical review package. It is designed to help a website owner, agency, developer, or privacy reviewer understand what loaded, what cookies appeared, and what should be checked first.

TECHNOLOGY ECOSYSTEMS

16

33 raw rule-level signal(s) grouped into user-facing ecosystems.

COOKIES OBSERVED

48

Cookies visible to the automated browser during the observation window.

UNKNOWN THIRD-PARTY DOMAINS

1

Third-party domains not yet classified by the current Auditzo rules.

TECHNICAL SCORE

0/100

Critical review priority

Included in this report

- Exact detected technology and vendor names
- Cookie names, domains, categories, and known/unknown status
- Technical review priority score with severity breakdown
- Scan geography, observation window, and consent-state context

Also included

- Domain-level evidence with timing and resource-type summaries
- Developer and privacy review checklists
- Report ID, scan ID, and rule-version audit trail

What was not tested in this scan

Auditzo is intentionally transparent about scan boundaries. This prevents overclaiming and helps teams decide whether a deeper evidence-backed review is needed.

Consent accept/reject behavior	Not tested. The scanner observed initial page-load behavior only.
Logged-in or account-only behavior	Not tested unless the scan was explicitly configured with authorized access.
Every region, browser, and device	Not tested. This report reflects the configured scan node, browser, and observation window.
Future or A/B test variations	Not guaranteed. Website tags, consent banners, and vendor scripts can change over time.
Legal compliance determination	Not provided. Auditzo provides technical observations and review signals only.

2. Top Recommended Actions

The most practical next steps based on the scan results.

1 Review advertising and marketing tags

Why this matters: Advertising and marketing pixels are often among the highest-priority privacy review items.

Recommended action: Ask your developer or tag manager owner to confirm whether these tags are disclosed and controlled by the consent/privacy-choice flow.

Owner: Marketing + Developer + Privacy/Legal

2 Review session replay or behavior analytics configuration

Why this matters: Session replay tools may capture detailed user interaction behavior and require careful configuration.

Recommended action: Confirm masking rules, sensitive-field exclusions, vendor disclosure, and whether the tool loads only when appropriate.

Owner: Developer + Privacy/Legal

3 Review analytics setup and cookies

Why this matters: Analytics tools may set identifiers or transmit page and browser context.

Recommended action: Check analytics cookies, IP/client identifier handling, retention settings, consent mode, and privacy disclosures.

Owner: Developer + Marketing + Privacy

4

Review customer data platform routing

Why this matters: Customer data platforms may route visitor identifiers, events, and audience data across systems.

Recommended action: Confirm what identifiers and events are collected, where they are sent, and whether disclosures/choices cover this use.

Owner: Marketing/Ops + Developer + Privacy

5

Review tag manager triggers

Why this matters: A tag manager can load multiple third-party technologies and can be the source of unexpected trackers.

Recommended action: Audit the container triggers and confirm non-essential tags are blocked until the required user choice.

Owner: Developer + Marketing

6

Review unclassified third-party domains

Why this matters: Some third-party domains were observed but are not yet classified by Auditzo's current rules.

Recommended action: Review unclassified domains before relying on the report as a complete vendor inventory.

Owner: Developer + Privacy/Compliance

7

Test consent accept/reject behavior separately

Why this matters: This scan observed initial page-load behavior only and did not click Accept or Reject.

Recommended action: For a stronger audit, run separate accept/reject/manual HAR workflows or verify consent blocking inside your CMP/tag manager setup.

Owner: Developer + Privacy/Compliance

OPTIONAL NEXT STEP

Need help interpreting this report?

This automated report captures initial browser-observation evidence. For deeper review, Auditzo can test consent states, review HAR files manually, capture additional screenshots, and prepare developer-ready remediation notes.

Custom Review Available

Best for legal/privacy teams, ecommerce brands, agencies, and teams needing stronger evidence than an automated scan alone.

[Request Custom Review](#)

3. Scan Geography & Regional Context

REGION-ALIGNED SCAN

This GDPR/ePrivacy report was generated from Auditzo's Germany/EU scan environment to better reflect EU visitor behavior.

Website behavior may still vary by EU country, consent state, browser, device, A/B testing, logged-in state, and time of visit.

Selected Framework	GDPR / ePrivacy
Framework Jurisdiction	EU / EEA-style privacy and cookie review
Scan Node	de-germany-1
Scan Country	Germany
Scan Region	EU
Observation Window	20.00 sec
Consent Interaction	Not Performed

Regional transparency: This report reflects the scan environment used for evidence capture. It should not be interpreted as proving identical behavior for every visitor, device, consent state, or region.

4. Score & Severity Explanation

SCORE

0/100

Critical technical review priority

Strong technical review signals were observed and should be reviewed urgently. This score reflects technical review priority, not a legal finding or compliance determination.

Severity	Raw Deduction	Cap	Applied Deduction
Critical	425	50	50
High	60	35	35
Medium	30	20	20
Low	0	10	0
Info	0	0	0

Cookies are shown as evidence, but V1 scoring avoids double-counting cookies when a related technology is already detected.

Grouping note: Severity counts shown in the user-facing report are grouped ecosystem counts. Score deductions may consider underlying raw rule-level signals, with caps applied to prevent excessive duplicate penalty.

5. Score Improvement Opportunities

1 Review and control advertising pixels

Check whether advertising, remarketing, or conversion pixels are properly disclosed and controlled by consent/privacy-choice settings.

Suggested owner: Marketing + Developer + Privacy

2 Review session replay and behavior analytics tools

Confirm masking rules, sensitive-field exclusions, vendor disclosure, and whether the tool loads only when appropriate.

Suggested owner: Developer + Privacy/Legal

3 Audit tag manager triggers

Review GTM or tag manager containers to confirm non-essential tags are not firing unexpectedly during initial page load.

Suggested owner: Developer + Marketing

4 Review analytics configuration and cookies

Check analytics cookies, client identifiers, IP-related settings, retention, consent mode, and privacy disclosures.

Suggested owner: Developer + Marketing + Privacy

5 Review unclassified third-party domains

Unclassified domains should be reviewed before relying on the report as a complete vendor or tracker inventory.

Suggested owner: Developer + Privacy/Compliance

6 Re-scan after implementation changes

After tag, consent, or disclosure changes are made, run a new scan and compare the results.

Suggested owner: Website Owner + Developer

6. Developer & Privacy Review Checklists

Developer Handoff Checklist

- Review tag manager/container triggers and identify which tags fire on initial page view.
- Confirm whether non-essential advertising, analytics, session replay, and marketing tags are blocked until the required user choice.
- Review cookies set during initial page load and map them to the responsible vendor or feature.

Privacy / Legal Review Checklist

- Review observed third-party scripts, pixels, cookies, and domains in the context of GDPR / ePrivacy.
- Review whether URL, referrer, cookie IDs, client IDs, IP-related metadata, browser/device signals, or interaction signals may be transmitted to third parties.
- Review session replay, chat widgets, analytics, advertising pixels, and tag managers first.

- Review third-party domains listed in the report and confirm whether each is expected.
- Check whether consent mode or CMP integration is correctly connected to analytics and advertising tags.
- Document changes made and re-run the Auditzo scan after implementation updates.
- Compare observed vendors and technologies against the privacy policy, cookie notice, and vendor disclosures.
- Review consent/privacy-choice behavior and whether scripts load before a required user choice.
- Treat this report as technical evidence for review, not as a legal conclusion.

7. Runtime Metrics Dashboard

Technology Categories

Technology Category	Count
Advertising / Marketing Pixel	6
Session Replay / Behavior Analytics	1
Web Analytics / Audience Analytics	1
Customer Data Platform	1
Web Analytics	1
Personalization / Experimentation	1
Video Embed / Video Analytics	1
Tag Management	1
Industry / Business Platform	1
Accessibility / Functional Widget	1
Font CDN / Typography Asset Delivery	1

Cookie Categories

Cookie Category	Count
Personalization / Experimentation	2
Web Analytics	12
Advertising / Marketing Pixel	19
Marketing Automation	5
Session Replay / Behavior Analytics	4
Customer Data Platform	1
Security / Fraud / Bot Protection	3
Unclassified Cookie	2

Grouped for readability: Auditzo grouped 33 raw rule-level technology signal(s) into 16 user-facing technology ecosystem(s). Underlying rule matches are retained in report data.

Priority Technology Ecosystems

Sorted for review priority: This table shows scoreable and higher-severity ecosystems first. Observed event count is still shown, but supporting technologies are not placed above critical review items only because they generated more network events.

Technology	Category	Severity	Evidence	First Observed
LinkedIn Advertising Ecosystem LinkedIn Corporation (Microsoft) Grouped 4 related signal(s)	Advertising / Marketing Pixel	Critical	Strong 23 event(s)	Early page-load 7.25 sec
Google Ads / DoubleClick Ecosystem Google LLC Grouped 3 related signal(s)	Advertising / Marketing Pixel	Critical	Strong 11 event(s)	Early page-load 7.69 sec
Microsoft Clarity Microsoft Corporation	Session Replay / Behavior Analytics	Critical	Strong 9 event(s)	Early page-load 7.25 sec
XXXXX ABM Ecosystem XXXXX Inc / Integrate Grouped 2 related signal(s)	Advertising / Marketing Pixel	Critical	Strong 6 event(s)	Early page-load 7.25 sec
X / Twitter Advertising Ecosystem X Corp / Twitter Grouped 5 related signal(s)	Advertising / Marketing Pixel	Critical	Moderate 6 event(s)	Early page-load 7.25 sec
The Trade Desk / adsrvr Ecosystem The Trade Desk Inc. 1 matched ecosystem signal	Advertising / Marketing Pixel	Critical	Strong 2 event(s)	Early page-load 8.08 sec
Microsoft Advertising UET Microsoft Corporation	Advertising / Marketing Pixel	Critical	Moderate 1 event(s)	Extended observation 10.17 sec
Google Analytics / GA4 Ecosystem Google LLC Grouped 2 related signal(s)	Web Analytics	High	Strong 9 event(s)	Early page-load 7.25 sec
Salesforce Data / Marketing Ecosystem Salesforce Inc Grouped 2 related signal(s)	Customer Data Platform	High	Strong 6 event(s)	Early page-load 5.72 sec

Technology	Category	Severity	Evidence	First Observed
Automattic / WordPress.com / Parse.ly Analytics Ecosystem Automattic Inc Grouped 3 related signal(s)	Web Analytics / Audience Analytics	High	Moderate 5 event(s)	Early page-load 5.77 sec

8. Priority Findings

The most important technical review signals. These are observations for review, not legal conclusions.

Finding 1: LinkedIn Advertising Ecosystem

Critical

LinkedIn Advertising Ecosystem groups 4 related Auditzo rule match(es), including LinkedIn Insight Tag, LinkedIn Analytics, LinkedIn (Main Domain). It was associated with snap.licdn.com, px.ads.linkedin.com, linkedin.com, px4.ads.linkedin.com.

EVIDENCE

Strong

FIRST OBSERVED

Early page-load

OWNER

Marketing + Developer + Privacy/Legal

Category	Advertising / Marketing Pixel
Company / Vendor	LinkedIn Corporation (Microsoft)
Grouped Rule Signals	4 related rule match(es)
Matched Domains	snap.licdn.com, px.ads.linkedin.com, linkedin.com + 1 more
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Score Impact	25
Framework Signal	Advertising Tracker Initial Load

Grouped signals: LinkedIn Insight Tag, LinkedIn Insight Tag, LinkedIn Analytics, LinkedIn (Main Domain)

What this means: Auditzo grouped related rule-level matches into one ecosystem so the report is easier to review. This ecosystem may include multiple scripts, pixels, endpoints, cookies, or sync requests from the same vendor family. Review the ecosystem as a whole, not as separate unrelated findings.

Recommended next step: Review LinkedIn Insight Tag, ad pixel, analytics, and identity-sync behavior together. Confirm whether LinkedIn-related tags and cookies are disclosed and controlled by the consent/privacy-choice flow.

Finding 2: Terminus ABM Ecosystem

Critical

Terminus ABM Ecosystem groups 2 related Auditzo rule match(es), including Terminus ABM Platform, Terminus ABM Assets CDN. It was associated with wec-assets.terminus.services.

EVIDENCE Strong	FIRST OBSERVED Early page-load	OWNER Marketing/Ops + Developer + Privacy

12. Unclassified Third-Party Domains

Third-party domains observed during the scan but not yet classified by current Auditzo rules.

UNCLASSIFIED DOMAINS	DETAILS VISIBILITY
1	Count And Categories

Domain	Root Domain	Resource Types	Seen Count
--------	-------------	----------------	------------

13. Representative Network Evidence

Standard reports show domain-level evidence, timing, resource type, and matched technology context. Full request URLs are reserved for the Detailed Evidence-Backed Report.

Evidence 1: LinkedIn Advertising Ecosystem	
Vendor	LinkedIn Corporation (Microsoft)
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Strong
Matched Domains	snap.licdn.com, px.ads.linkedin.com, linkedin.com, px4.ads.linkedin.com
Resource Types	script, xhr, image, fetch
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Grouped Rule Signals	4 related rule match(es)
Occurrence Count	23
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.
Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.	

Evidence 2: Terminus ABM Ecosystem

Vendor	xxxxx Inc / Integrate
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Strong
Matched Domains	wec-assets.terminus.services
Resource Types	script, image
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	6
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 3: Microsoft Clarity

Vendor	Microsoft Corporation
Category	Session Replay / Behavior Analytics
Severity	Critical
Evidence Strength	Strong
Matched Domains	clarity.ms, scripts.clarity.ms, z.clarity.ms, c.clarity.ms
Resource Types	script, xhr, image
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	9
Evidence Type	Matched Auditzo rule plus browser network observation. Full request URL is reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 4: X / Twitter Advertising Ecosystem

Vendor	X Corp / Twitter
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Moderate
Matched Domains	static.ads-twitter.com, analytics.twitter.com, t.co, platform.twitter.com
Resource Types	script, image
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Grouped Rule Signals	5 related rule match(es)
Occurrence Count	6
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 5: Google Ads / DoubleClick Ecosystem

Vendor	Google LLC
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Strong
Matched Domains	ad.doubleclick.net, 16011779.fls.doubleclick.net, stats.g.doubleclick.net, adservice.google.com
Resource Types	fetch, document, ping, image
First Observed	2026-06-09 17:24:57.257Z (7.69 sec after scan start)
Grouped Rule Signals	3 related rule match(es)
Occurrence Count	11
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 6: The Trade Desk / adsrvr Ecosystem

Vendor	The Trade Desk Inc.
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Strong
Matched Domains	match.adsrvr.org
Resource Types	image
First Observed	2026-06-09 17:24:57.649Z (8.08 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	2
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 7: Microsoft Advertising UET

Vendor	Microsoft Corporation
Category	Advertising / Marketing Pixel
Severity	Critical
Evidence Strength	Moderate
Matched Domains	c.bing.com
Resource Types	image
First Observed	2026-06-09 17:24:59.737Z (10.17 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	1
Evidence Type	Matched Auditzo rule plus browser network observation. Full request URL is reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 8: Automattic / WordPress.com / Parse.ly Analytics Ecosystem

Vendor	Automattic Inc
Category	Web Analytics / Audience Analytics
Severity	High
Evidence Strength	Moderate
Matched Domains	pixel.wp.com, cdn.parse.ly.com, api.parse.ly.com, p1.parse.ly.com + 1 more
Resource Types	image, script, fetch
First Observed	2026-06-09 17:24:55.339Z (5.77 sec after scan start)
Grouped Rule Signals	3 related rule match(es)
Occurrence Count	5
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 9: Salesforce Data / Marketing Ecosystem

Vendor	Salesforce Inc
Category	Customer Data Platform
Severity	High
Evidence Strength	Strong
Matched Domains	cdn.c360a.salesforce.com, mvtgdnbvmjrggyjrmqydky3gmq.c360a.salesforce.com, 1476201.collect.igodigital.com, nova.collect.igodigital.com
Resource Types	script, xhr, fetch, image
First Observed	2026-06-09 17:24:55.295Z (5.72 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	6
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 10: Google Analytics / GA4 Ecosystem

Vendor	Google LLC
Category	Web Analytics
Severity	High
Evidence Strength	Strong
Matched Domains	google-analytics.com, analytics.google.com
Resource Types	script, xhr, fetch
First Observed	2026-06-09 17:24:56.818Z (7.25 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	9
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 11: Optimizely

Vendor	Optimizely
Category	Personalization / Experimentation
Severity	Medium
Evidence Strength	Strong
Matched Domains	cdn.optimizely.com, a10829270344.cdn.optimizely.com, logx.optimizely.com
Resource Types	script, document, xhr
First Observed	2026-06-09 17:24:55.295Z (5.72 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	3
Evidence Type	Matched Auditzo rule plus browser network observation. Full request URL is reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 12: Vidyard Video Ecosystem

Vendor	Vidyard Inc
Category	Video Embed / Video Analytics
Severity	Medium
Evidence Strength	Moderate
Matched Domains	play.vidyard.com
Resource Types	script
First Observed	2026-06-09 17:24:55.295Z (5.72 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	2
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 13: Google Tag Manager

Vendor	Google LLC
Category	Tag Management
Severity	Medium
Evidence Strength	Strong
Matched Domains	googletagmanager.com
Resource Types	script
First Observed	2026-06-09 17:24:56.016Z (6.45 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	4
Evidence Type	Matched Auditzo rule plus browser network observation. Full request URL is reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 14: DealerTrack / Cox Automotive Platform

Vendor	Cox Automotive Inc
Category	Industry / Business Platform
Severity	Low
Evidence Strength	Strong
Matched Domains	us.dealertrack.com
Resource Types	document, script
First Observed	2026-06-09 17:24:56.575Z (7.00 sec after scan start)
Grouped Rule Signals	1 matched ecosystem signal
Occurrence Count	3
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 15: AudioEye Accessibility Ecosystem

Vendor	AudioEye Inc
Category	Accessibility / Functional Widget
Severity	Low
Evidence Strength	Strong
Matched Domains	ws.audioeye.com, wsv3cdn.audioeye.com, analytics.audioeye.com
Resource Types	script, ping, stylesheet
First Observed	2026-06-09 17:24:59.395Z (9.82 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	26
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

Evidence 16: Adobe Fonts / Typekit Ecosystem

Vendor	Adobe Inc
Category	Font CDN / Typography Asset Delivery
Severity	Info
Evidence Strength	Strong
Matched Domains	use.typekit.net, p.typekit.net
Resource Types	stylesheet, font
First Observed	2026-06-09 17:24:55.282Z (5.71 sec after scan start)
Grouped Rule Signals	2 related rule match(es)
Occurrence Count	3
Evidence Type	Grouped ecosystem evidence from related Auditzo rule matches plus browser network observations. Full request URLs are reserved for the Detailed Evidence-Backed Report unless request-level evidence is enabled.

Detailed evidence boundary: Full request URLs, expanded HAR-backed evidence, artifact hashes, and deeper appendix detail are available in the Detailed Evidence-Backed Report.

14. Evidence Package Summary

This Standard Report confirms the evidence package created during the scan. Full artifact hashes and deeper integrity detail are reserved for the Detailed Evidence-Backed Report.

HAR Created	Yes
Screenshots Created	Yes
Cookies File Created	Yes
Network Events Created	Yes
Detailed Hashes	Available in the Detailed Evidence-Backed Report

Evidence boundary: This summary supports report traceability but does not determine legal compliance.

15. Framework Context, Glossary & Limitations

Framework Review Context

Technical review signal only. Auditzo does not determine GDPR or ePrivacy compliance.

Framework	GDPR / ePrivacy
-----------	-----------------

Jurisdiction	EU / EEA-style privacy and cookie review
Report Label	GDPR/ePrivacy technical tracking review
Scan Region Preference	EU / Germany

Glossary

Technical Risk Score

A score based on observed technical review signals. It is not a legal compliance score.

Tracker

A script, pixel, or technology that may collect or transmit usage, advertising, analytics, or identifier-related data.

Cookie

A browser storage value used by websites and vendors for sessions, preferences, analytics, advertising, security, or other purposes.

Third-Party Domain

A domain contacted by the page that is not the main website domain.

Session Replay

A tool category that may record or reconstruct user interactions such as clicks, scrolling, and page behavior.

Consent Interaction

Whether Auditzo clicked Accept, Reject, or customized consent choices. V1 usually observes initial load only.

Scope, Limitations & Disclaimers

- Auditzo provides technical website tracking and cookie observations. This report is not legal advice and does not determine legal compliance.
- This scan reflects initial page-load behavior only. Consent accept/reject interaction was not performed unless explicitly stated.
- Website behavior, cookie banners, trackers, scripts, and consent flows may differ by visitor geography and scan environment.
- Framework-specific findings are technical review signals for the selected framework and should be reviewed by qualified legal, privacy, or compliance professionals.

16. Audit Trail & Document Control

This section supports auditability but does not determine legal compliance.

NEED DEEPER EVIDENCE?

| Want a customized evidence-backed review?

Auditzo can prepare a customized review with consent-state testing, additional screenshots, manual HAR review, deeper tracker analysis, and developer-ready remediation notes.

Included options

- Consent accept/reject state comparison
- Manual HAR and screenshot evidence review
- Developer-ready remediation notes
- Privacy/legal review support package

Best for

Legal/privacy teams, ecommerce brands, agencies, and teams needing stronger evidence than an automated scan alone.

Next step: Visit <https://www.auditzo.com/contact> or use the upgrade link from your secure Auditzo status page.
